

# TWINHEAD LED UV

Just like our arc lamp technology, Aradiant offers customized LED solutions to suit your specific needs. Rather than one design, **Aradiant can fit or retrofit into any printing press!**

- More Power – up to 40w/cm<sup>2</sup>
- Longer Exposure – more time under the LEDs
- Broader frequency range – multiple combinations available

Twinhead or single array options available – combine any wavelengths of LEDs

- Total refrigerated water-cooling allows greater power in a small package.
- Available in any length.....from 1" to 144" (25mm to 3650mm)
- Customized to be installed on any type of equipment that requires UV curing.
- Factory installed and serviced

**Aradiant's higher power comes at a lower price!**

Aradiant manufactures UV for *all* types of machines  
narrow web, wide web, sheetfed offset, screen, and metal decorating
